Re: Resolution on curricular design changes

At our Division meeting of May 2, members of the Social Science Division charged a subcommittee to prepare a resolution of no confidence in the current curricular process for the 30-60-90 and "WOU Way." We feel the process is not well-led, nor does it support faculty governance. We see this as part of a pattern of leaving faculty out of key decision-making on campus. We will share this resolution with other Divisions with the goal of bringing it to Faculty Senate for a vote.
