

GEC Faculty Senate report 1/22

GEC met and reviewed 54 unique FYS proposals, 46 of which were accepted without concerns, six of which were accepted with follow up from FYS coordinator Shaun Huston to clarify articulation and alignment to General Education learning outcomes and FYS criteria. Two proposals were recommended to revise and resubmit next year.

We are now in the process of confirming FTE with faculty who submitted proposals. Shaun will be following up with FYS instructors with more information about finalizing titles and descriptions and Erin will be following up with information about the FYS assessment plan for next year. The General Education program will be hosting workshops throughout the remainder of the academic year to assist with FYS course development.

Integrating Knowledge proposals have already begun to come in. The deadline for submission is February 12. Following the approval of this last Gen Ed category, we will be finalizing our advising documentation for SOARS, etc.
