

Proposal to offer the major program in Information Systems (BS & AB) at Chemeketa  
Community College, Lancaster Campus

The Information Systems (IS) program of the Computer Science Division proposes to deliver the upper division course work required for WOU's Information Systems major in person on the Lancaster Campus of Chemeketa Community College. The courses will be offered primarily weekdays during the late afternoon or early evening in a hybrid format, utilizing the existing classrooms and laboratory facilities of Chemeketa's Computer Information Systems AAS program. Offering these courses at this location will create an accessible pathway for working adults with a two-year degree in Computer Information Systems to earn a Bachelor's degree (AB) in Information Systems. These course offerings are not intended to take the place of program course offerings on the Monmouth campus for traditional students and fulltime AB students in IS.
