S*/NC Information

Basic Information
- Students will have until Week 7 to choose the S*/NC grading option

Impact to Certain Programs
- There is no way to make the S*/NC grading option recognize courses with grade prerequisites
- D- will be considered passing for any course once the S*/NC option is selected

Messaging
- In addition to the usual message we sent students in the spring regarding this grading option, we can also:
  - Alert students to programs and coursework where this option would be inappropriate
  - Share the list of programs and coursework with advisors so that we can guide students appropriately
  - Add syllabi statements about why your program or coursework is not a good fit for this grading option or have a general syllabi statement we can all use about the S*/NC grading option
- None of these options **prevent** students from choosing the S*/NC option, but more transparent communication might help students make the best choices for themselves

Transfer
- We cannot retroactively change a student's transcript once they've chosen the S*/NC option
- However, grades are stored in our system and we can verify the grade a student received for a transfer institution
